

I strongly oppose weakening New Jersey's do not call list. I am an RN, working the night shift at any area hospital. I need my sleep to be alert on the job. However, as a mother of school age children, I cannot just turn off the phone ringer. The New Jersey do not call list has helped me get the rest I need to perform my job without the degree of fatigue that I previously experienced from telemarketing calls interrupting my sleep.

Thank you for your consideration

Jan Masters, RN, BSN
